### **DETAILED ACTION**

(1). The Amendments and Remarks filed on 8/11/2009 have been received.  
Claims 1-11, 16, 18-20 and 22 are cancelled.  
The rejections of claims 16-22 in prior Office Action dated 6/11/2009 is withdrawn in view of the current Amendments.

### **EXAMINER'S AMENDMENT**

(2). An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with **Attorney Christopher Cronin on August 17, 2009**.

The application has been amended as follows:

Deleting the phrase "which may be used" in instant claims 15 & 17. The amended sentence of claims 15 & 17 is underlined in the following:

Claim 15: A method for injecting carbon dioxide into a pressurized gaseous stream, said method comprising:

< rest of the claim 15 is the same as the amendments filed on 8/11/2009 >

Claim 17: An apparatus for enriching a gas stream with carbon dioxide, said apparatus comprising:

< rest of the claim 17 is the same as the amendments filed on 8/11/2009 >

### ***Allowable Subject Matter***

(3). **Claims 12-15, 17 and 21** are allowed.

### ***Reasons for Allowance***

(4). The following is an examiner's statement of reasons for allowance:

Instant Application is in condition of Allowance in view of the current Amendments which overcomes the teaching of closest prior art of the records: Whitlock et al (US 4806171).

Whitlock (US 4806171) teach apparatus and method for removing minute particles from a substrate (Title) comprising a source of fluid carbon dioxide as illustrated in the Figure below: Nitrogen gas receiving port 40, carbon dioxide solid/gas mixture flow at 2<sup>nd</sup> orifice 16 in the apparatus 2.

FIG. 2

Whitlock et al (US 4806171) do not teach the step of injecting the mixture of two-phase carbon dioxide and 2<sup>nd</sup> gas into a pressurized gas stream with an injector wherein injector is connected to the chamber containing stream as claimed by Applicants. Also, Whitlock et al (US 4806171) do not teach the deflector located at an end of injector wherein deflector comprises two slopes for distributing two-phase carbon dioxide into the gas stream as claimed by Applicants. The Applicants' invention is shown in the Figure herein for further illustration:

Other related, pertinent prior art of records such as Hayashi (US 4747421), Schmidtke (US 5172555A), they fail to disclose the features claimed by Applicants as discussed above for the Whitlock et al (US 4806171). Therefore, claims 12-15, 17 and 21 are considered to be patentable subject matters and passed to issue as of the date of this Allowability Notice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
